Presentation

Hi Students!

The year 1956-57 has made a lasting impression upon your lives. It has been built upon scholastic work as well as school activities. Remember the first week of school, the football season, the Homecoming festivities, and the Basketball games? Of course, the Spring sports cannot be forgotten. The third hour notices gave you an account of the happenings of your school. Those five minutes between classes were well waited for, and many of you were seen discussing your plans for after school or the ~~event~~ of the night before. Senior Prom was spent as a night in Mexico. Before Graduation when you lost all your Senior friends, every student was home cramming for those terrible two hour examinations. Students of O.H.S., this is your life!

Classes

College Prep Courses

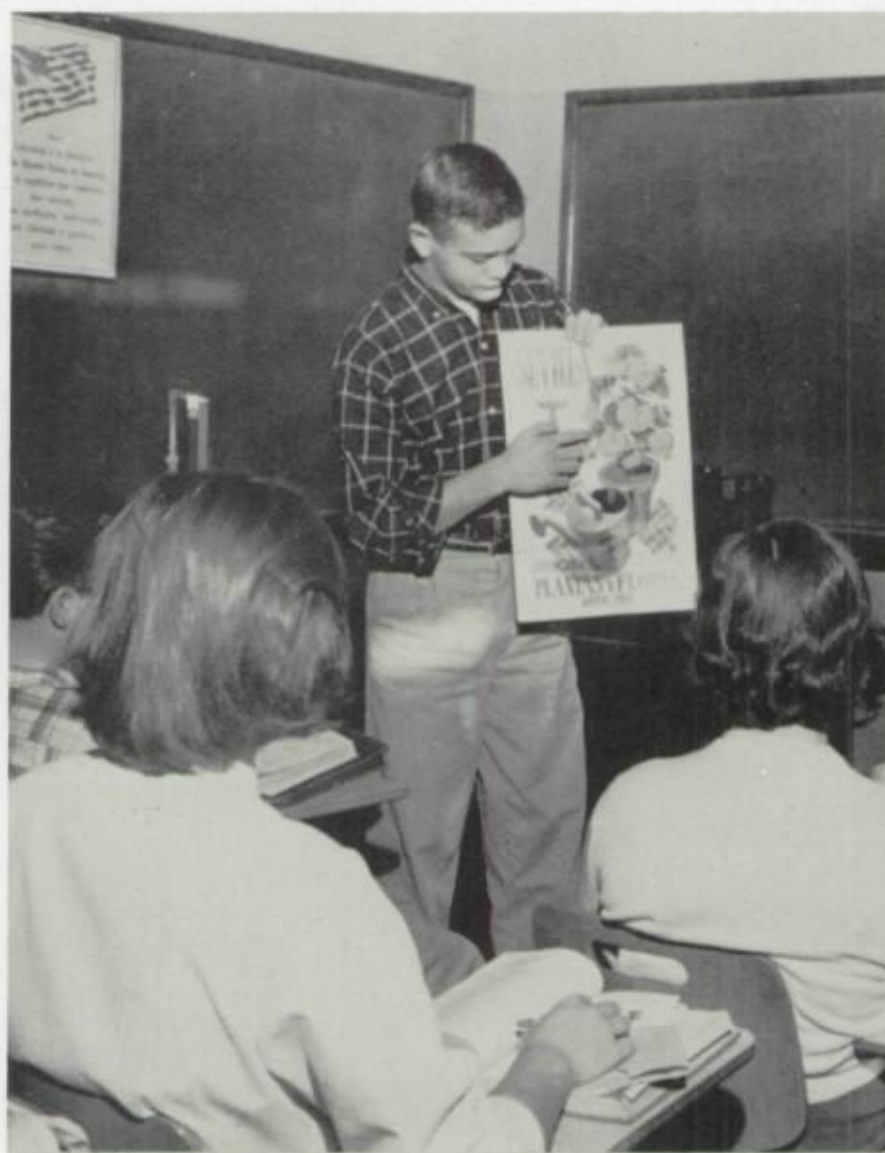

Certain courses are required for the college preparatory students. Each student must have two majors and two minors. Everyone is urged to take four years of English.

Gordon Lowell and Tom Fookes demonstrate the Pythagorean Theorem to the class, while Marge Anderson works a right triangle formula.

Gloria Frederick conjugates the Latin verb *call* at the board, while Jerry Yenik studies at his desk.

David White reads a Spanish poster to his class.

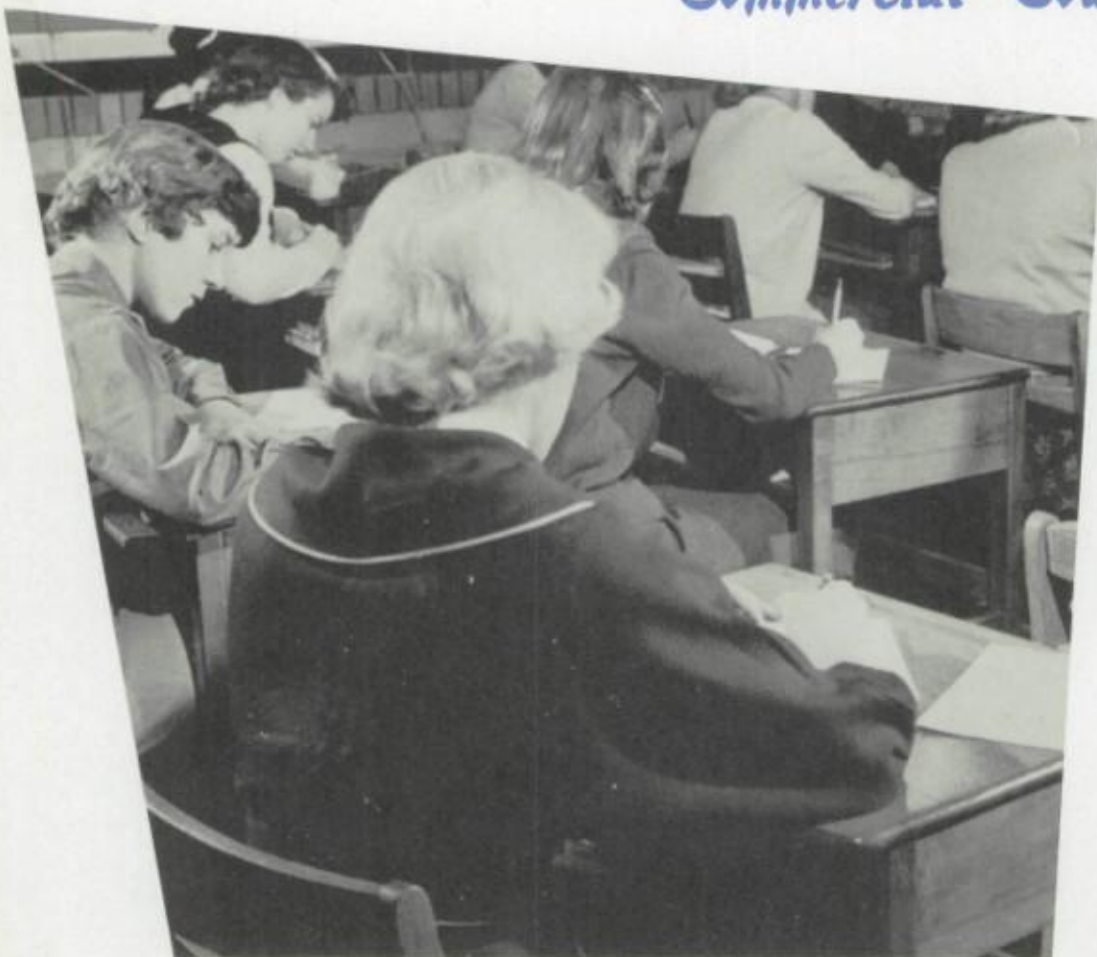

Rhetoric is an English refresher course for college. Judi Reeves, Bob Bremer, and June Klemperik diagram the day's sentences on the black board.

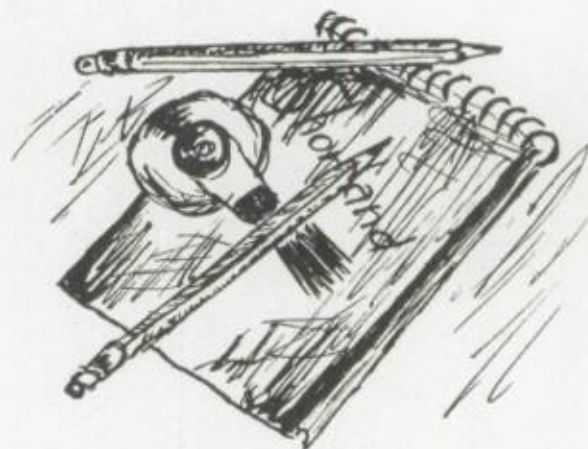

Judy Spitler and Sandra Miller, and Janet Smith and Lynne Hartshorn work in the Chemistry lab experimenting with chemicals and acids.

Commercial Courses

Nancy Swanson, with the shorthand class, takes dictation.

Louise McCaffrey types her practice drills to the sound of music.

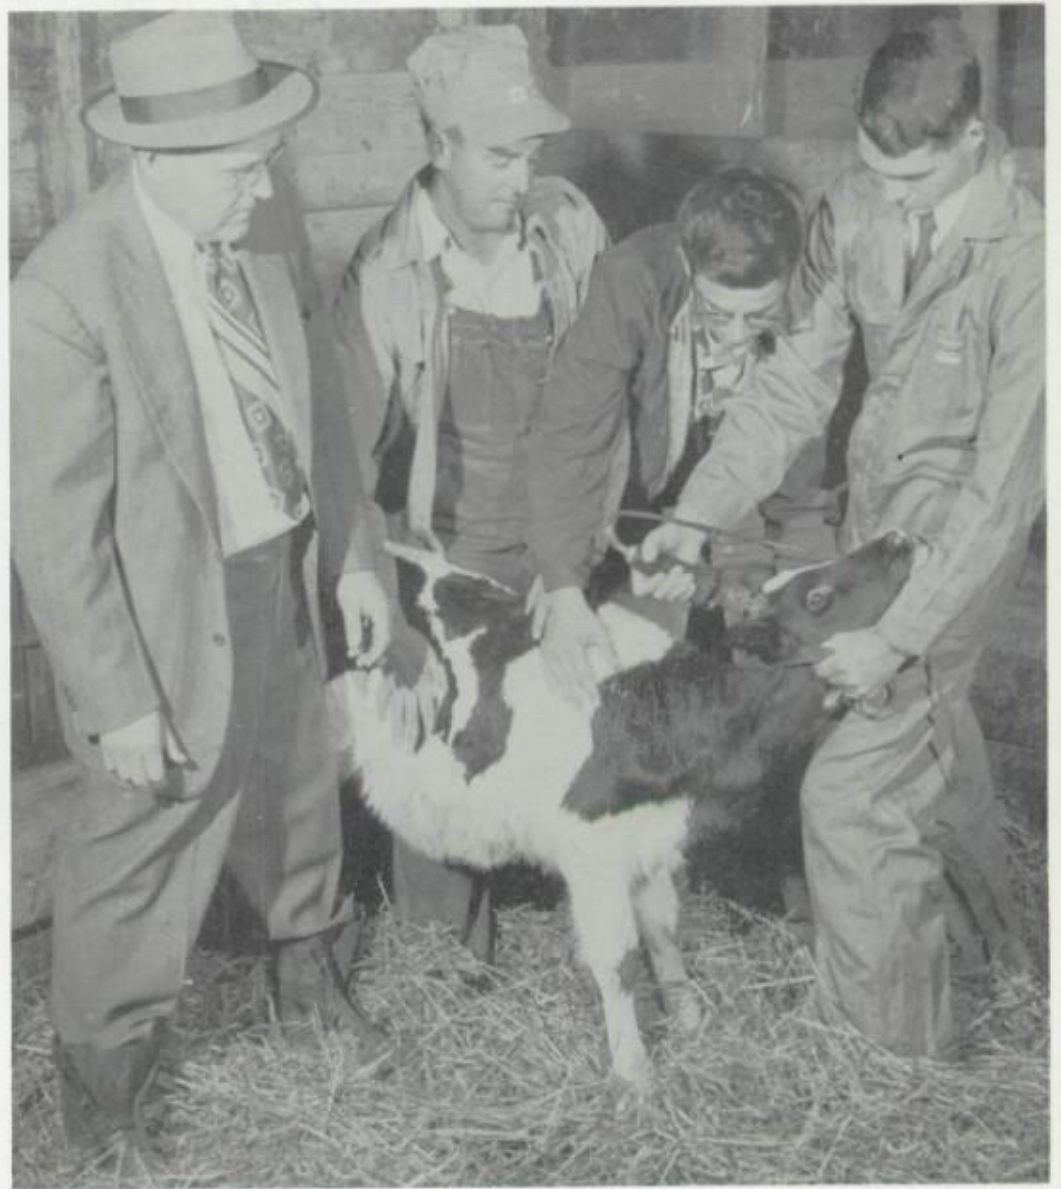

Charles Berthume takes dictation from stenotype.

Agricultural Courses

There are sixty-two boys in the Agriculture Department. During the year they work on their own Supervised Farming Program at their own farms using their own equipment. Last year a total of 212 projects were completed, bringing in a net income of \$39,428.71. Each boy has one or more improvement projects such as building, repairing, and landscaping. They participate in fairs, some of which are Shiawassee County, Saginaw County, State Fair, and Midwinter.

Mr. Hill, Mr. Lecureux and Allen Lecureux are looking on as Mr. Bawden dehorn a calf.

Dave Willard, Terry Gulick, and Jerry Kasik are demonstrating the construction of a pole barn.

Bill Turner watches the press roll out the Senior Play programs during print shop.

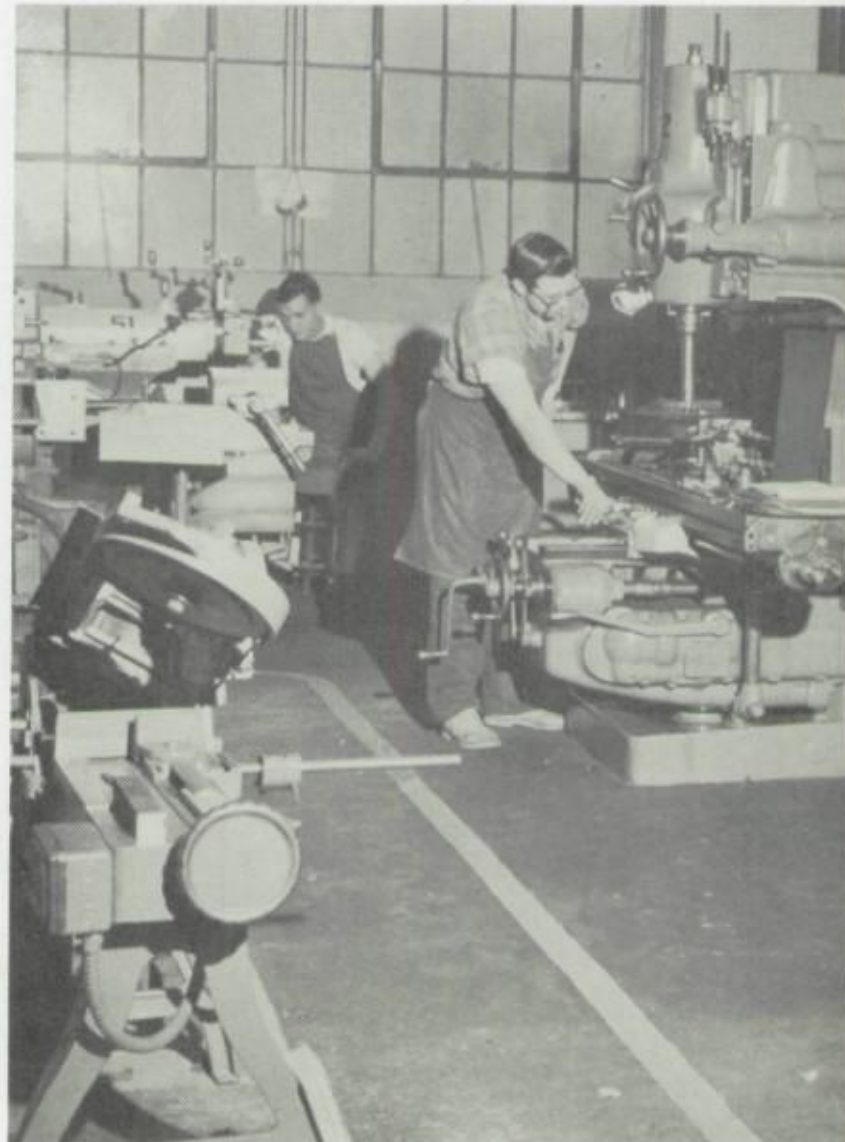

Tom Vogl looks on while Allan LeCureux practices using a Wrico-lettering pen in mechanical drawing.

Calvin Allen helps Dale Rourke lay out plans for a cabinet in woodshop.

Industrial Arts

LeRoy George is busy working in metal shop on the vertical milling machine, while Don Walsh works on the shaper and John Kuchar works on the horizontal milling machine.

Miss Dershem demonstrates the correct way to measure flour to the boys' cooking class.

Elanore Good is sewing a straight seam and Joanne Busci is threading the machine in sewing class.

Mary Ann Leiner, who has finished molding her project in ceramics, is about to bake it.

On the window above the main entrance Louise McCaffrey and Carol Kinnison finish painting Mary, a part of the Christmas decorations. The art department has been responsible for the many lovely window decorations during the holiday season.

Fine Arts

Many of our talented students take some art course. Without the ideas of the art department students, our school would look drab on Holidays.

The choruses add to our concerts and Hi Jinks. The students gain a greater appreciation of music through their efforts.

"All right, girls. Altogether!" Mr. Gilbert's fifth hour girls' chorus prepare a new song for Hi Jinks.

The Choruses Sing Together

"Hold that note, boys!" Mr. Gilbert directs the boys in his sixth hour class "to hold that note!"

General Courses

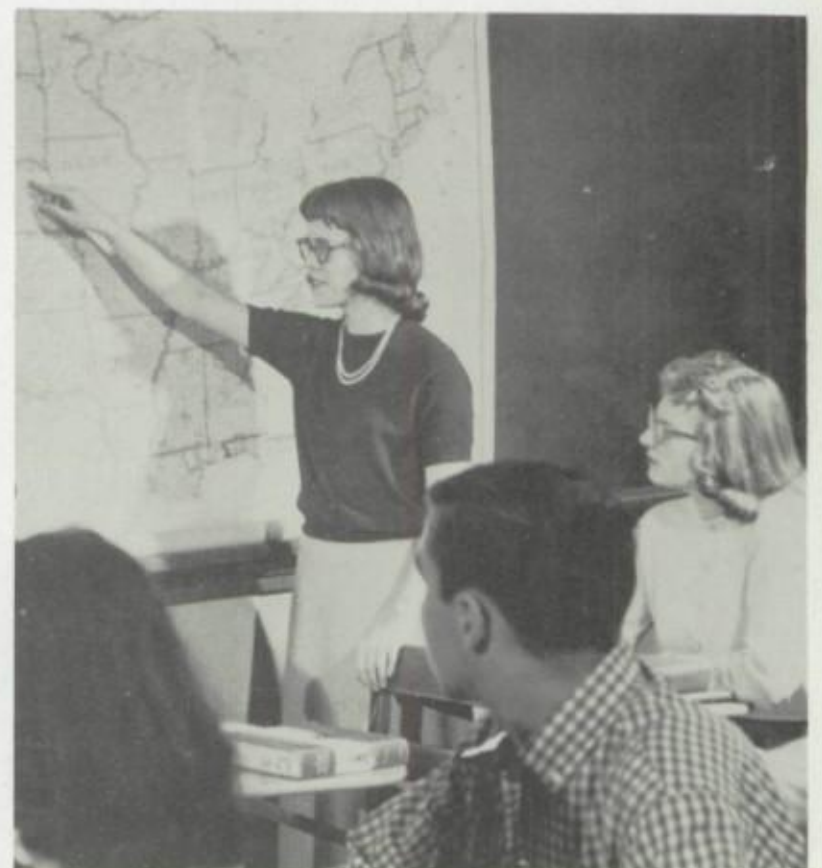

Prudy Pardee and Judy Hawkey hope the ball will come their way so they can help it over the net.

The boys in football gym learn speed and accuracy. Down-set-hut two-hut two.

Mike Losey explains the Articles of Confederation to a government class.

Linda Lotridge points to the Louisiana purchase in U. S. History Class.

General High Courses

The General High Course is planned to accomodate the student who doesn't know what his life's work will be. The required subjects are three years of English, one of science, and one of history and one semester each of government and mathematics. The students choose the rest of their subjects from a long list of electives.

Richard Lehman looks at the picture Mary Leiner has just developed for the SPIC, while Bob Allen is developing another picture.

Jim Haidt gives the Visual Acuity test to Jim Floate, while the rest of the class looks on.
